Instant Pulse Count

A smartphone app for the well being of elderly people. This is a digital way to monitor your heartbeat. use this to get instant results and enjoy your vacations or family gatherings even on remote places peacefully.

Make your heart smile!

It allows elderly people to check their heartbeat whenever and wherever they want. It uses your phone's camera to check your pulse rate. You need to put tip of your finger on camera and it notes changes in the color or your finger’s tip and accordingly gives you result. You can even record your history on day-to-day basis.
